### *Response to Arguments*

1. The prior Office action, mailed August 20, 2004 (paper 8), objects to the claims, and rejects claims under 35 USC § 102, citing Lybrook. The Applicant's arguments and changes in AMENDMENT IN RESPONSE TO NON-FINAL OFFICE ACTION filed November 1, 2004 have been fully considered with the following results.
2. With respect to objection to the claims dependent upon rejected base claims, the base claims have been allowed. Accordingly, the objections are removed.
3. With respect to rejection of claims under 35 USC § 102, citing Lybrook, the changes entered by amendment include a basis of a linguistic characteristic of syllables and an association of the linguistic characteristic with a musical note.

The reference Lybrook does not explicitly describe those limitations. The whole structure expressed by the combination of all limitations compared to the prior art of record is not made obvious for the whole invention of the claims 1, 17, and 20, particularly with mapping responsive to speech to provide a modified speech signal with a basis in a musical notes based on the tone data. Accordingly, the rejections are removed. The Applicant's assertions with respect to Lybrook have been considered, but they are moot in view of the new claim elements.
